PRÜFTECHNIK GmbH & Co. KG

Leak Tester | Flow Tester | Test Systems | Testing Machines

ABOUT US

HeMaTech Prüftechnik GmbH & Co. KG is a manufacturer of test equipment for leakage and flow.

We are a medium-sized family business. HeMaTech Prüftechnik was founded in 2005.

Our location is Schwaikheim near Stuttgart. Here we develop and build the devices and the matching fixtures and machines.

Advice on the implementation of your testing requirements are a natural part of our company philosophy.

HeMaTech Prüftechnik offers comprehensive service and fast support for all aspects of the test equipment.

PRODUCTS

HeMaTech Prüftechnik is known for robust, durable test equipment with high accuracy for leak and flow testing.

Users worldwide trust in the reliability and service of HeMaTech Prüftechnik.

Leak detectors using the differential pressure method have become indispensable in many areas of industry when it comes to testing serial parts during production.

PRODUCTS

Flow measurement is widely used in the manufacturing industry.

A flow tester can be used to check pipe structures (e.g. exhaust systems), valves, fittings and many other products.

The direct measurement of the mass flow is a very accurate measuring technique. In addition, there is the large selection of possible measuring ranges. This allows you to use our flowmeters for a wide variety of applications.

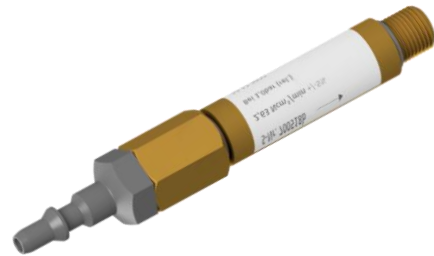

Flow Tester 0170

HeMaTech offers leak calibration equipment and test leaks for setting up leak test systems and checking them regularly.

A test leak or leak calibrator can be connected directly to the leak tester via the corresponding interface.

Regular use is thus possible quickly and easily.

FIXTURES

In cooperation with our partner HeMaTech Automatisierungstechnik we offer you the suitable fixtures.

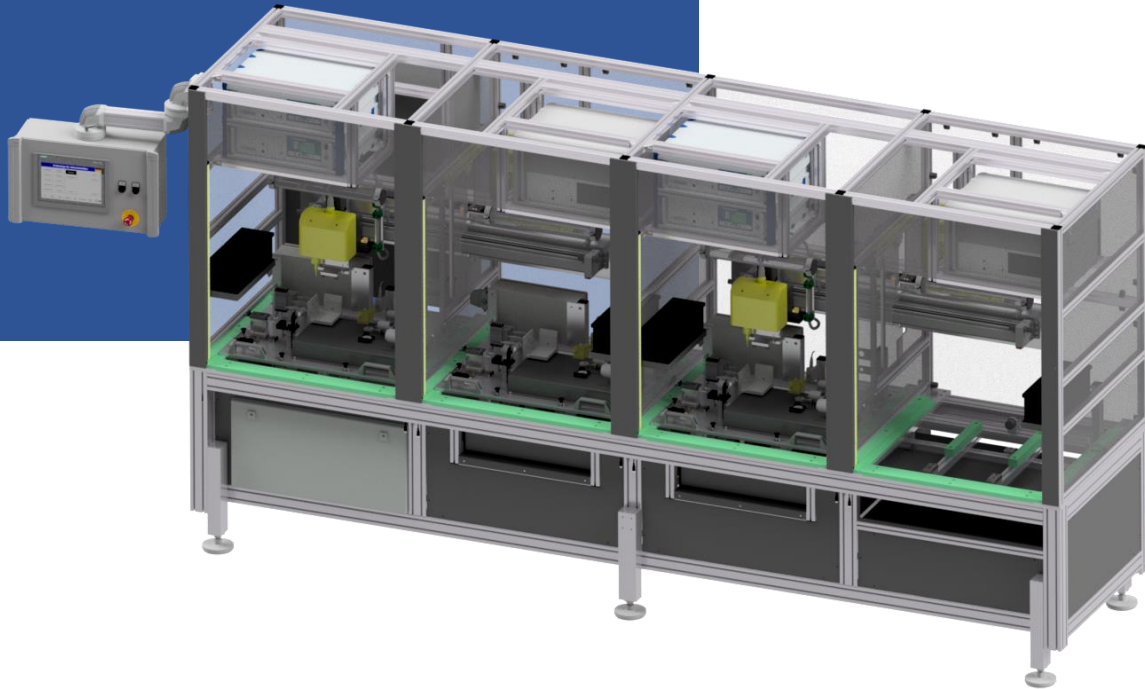

Fixture for leak testing of housings, with two sealing points and manual operation

Fixture for leak testing of shafts, with manual operation

MASCHINES

For use in series production with high volumes, we supply partially and fully automatic testing machines.

Semi automatic 4-fold leak and flow testing machine for filters

Semi automatic leak testing machine for sensors

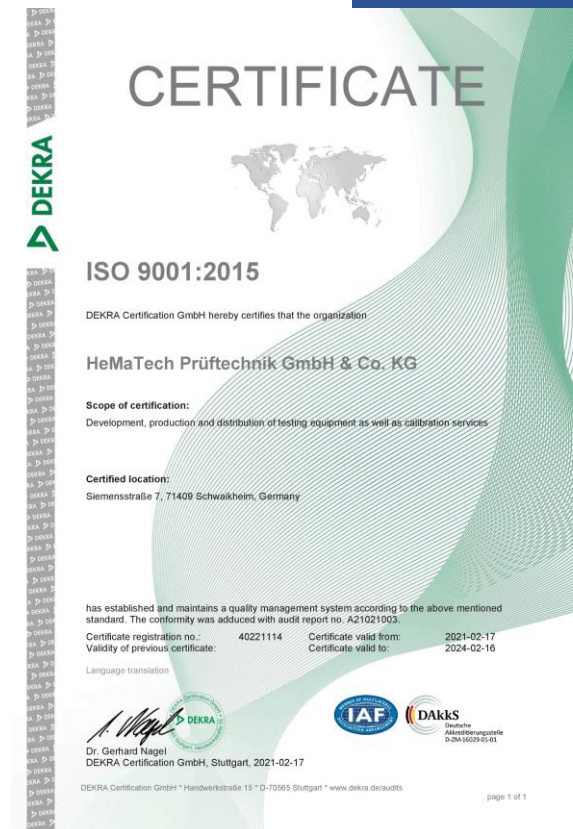

HeMaTech Prüftechnik ist certified to
ISO 9001:2015.

Every instrument leaves our factory after a
24-hour endurance test and with a factory
certificate. Recalibration is useful or
necessary at regular intervals.

Our service technicians carry out
maintenance and calibration with
commitment and competence –
either at your site or at our service center in
Schwaikheim

We repair your equipment quickly and
reliably - even as an express repair
if you are in a hurry.

Rental equipment is available for tests
or to bridge downtimes.
